INTERNSHIP

- ❖ **Central Tool Room & Training Centre (CTTC), MSME – Govt. of India** || June 2025 – July 2025
Data Analytics Intern:
 - Cleaned, transformed, and analyzed structured datasets using Python and machine learning models to support data-driven decision-making.
 - Designed **6** interactive dashboards and reports using Advanced Excel and Tableau, enabling stakeholders to track key performance metrics.
 - Wrote SQL queries to extract, join, and aggregate data across multiple tables, streamlining the reporting workflow.
- ❖ **Odisha Computer Application Centre (OCAC) – Govt. of Odisha** || May 2026 – June 2026
Python Intern:
 - Architected a relational database schema and connectivity layer in MySQL, supporting real-time data persistence for **50–100** records during development and testing.
 - Developed multiple desktop application modules using Python (Tkinter) with custom forms, navigation, and UI components for a real-world internal tool.
- ❖ **Quillance Infotech Pvt. Ltd.** || Aug 2026 – Oct 2026
Data Science Intern: (Remote Mode)
 - Learning Excel for data organization, analysis, and reporting as part of hands-on data science training.
 - Building foundational data science skills, including core concepts in data analysis and interpretation, through applied training modules.

EDUCATION

- **B. Tech. – CSE** | Synergy Institute of Engineering and Technology, DKL || CGPA: 8.21 || 2023 – 2027
- **12th (CHSE)– Science** | Dhenkanal Mahila Mahavidyalaya || 71% || 2021 - 2023

PROJECTS

- ❖ **AI-Based Resume Analyzer:** (GitHub/Live)
 - Built and deployed a full-stack AI-powered resume analyzer (**Python, Streamlit, TF-IDF, Cosine Similarity, NLTK, Scikit-learn, PostgreSQL, Supabase, Render**) using NLP-based text-similarity scoring, and validated performance across **100+** test resumes.
- ❖ **TutorBridge – Find The Right Tutor In Your New City:** (GitHub)
 - Led a team of **4** to design and build TutorBridge (**Python, Tkinter, MySQL**), architecting a complete database schema and admin portal supporting **50–100** tutor/student records, enabling location-, subject-, and availability-based tutor search.
- ❖ **AI – DA Copilot:** (GitHub/Live)
 - Built an AI-powered analytics platform (**Python, Pandas, Plotly, Flask, local LLM**) that automates dataset profiling, preprocessing, and visualization for **CSV and Excel** files, by combining rule-based data-cleaning pipelines with natural-language insight generation to help users analyze data faster than manual EDA.

SKILLS

- **Programming & Query Languages:** Python, SQL, HTML, CSS
- **Data Analysis:** Data cleaning, Dashboarding, Statistical analysis
- **Data Visualization:** Power BI, Excel (Advanced), Looker Studio, Tableau
- **Databases:** MySQL, PostgreSQL
- **Libraries:** NumPy, Pandas, Tkinter, Flask, Streamlit
- **Tools:** Git & GitHub, Jupyter Notebook, VS code
